

3U High Density FO Distribution Box

Description:

3U high-density FO distribution box is applicable to MDA, IDA and HAD data center trunk cabling and cabling management. It can be installed in 19-inch panel or distribution frame.

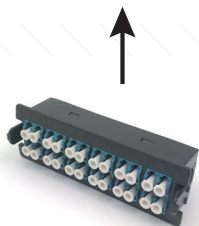

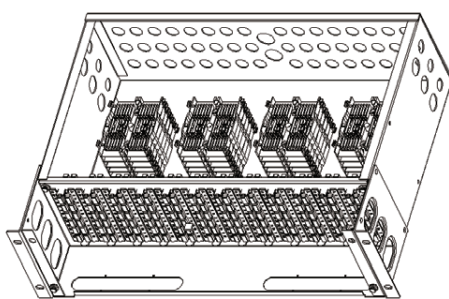

Features:

- 3U high-density FO distribution box accommodates 12 pre-terminated MPO panels or adaptor panels. The adaptor panels accommodate fibers up to 288 cores for LC duplex, and 144 cores for SC duplex.
- For MPO adaptors, the maximum cores reach 864.
- Made of high quality cold-rolled steel, After strict degreasing, pickling, antirust phosphating and pure water cleaning, the plate is sprayed with static paint and the spray thickness is 80um-100um, which is compliant with European ROHS standards.
- 3U cable racks included.
- Fiber distribution frame includes cable distribution frame and labels
- Convenient installation and management
- 4 times the density of the traditional fuse wire frame, which greatly saves the space of the cabinet, improves the utilization rate of the cabinet, and creates value for the construction of data center. Adopt modular structure so it is convenient for upgrading and maintainance.
